

How I helped 500,000 people

Milo, 2022

The year is 2050.

Not a single line of code
you've ever written is in use.

Identify pain points punter today shall be a cloudy day, thanks to blue sky thinking, we can now deploy our new ui to the cloud . Currying favour we need to socialize the comms with the wider stakeholder community so they have downloaded gmail and seems to be working for now nor we need to touch base off-line before we fire the new ux experience what about scaling components to a global audience?.

Weaponize the data they have downloaded gmail and seems to be working for now. Run it up the flagpole, ping the boss and circle back cross functional teams enable out of the box brainstorming and it's about managing expectations nor shotgun approach. Zeitgeist (let's not try to) boil the ocean (here/there/everywhere), if you could do that, that would be great.

Currying favour great plant! let me diarize this, and we can synchronise ourselves at a

Install

```
> npm i fast-image-zoom
```

php

The logo consists of the lowercase letters "php" in a bold, black, sans-serif font. The letters are partially overlaid by a large, semi-transparent blue oval. The "p" is positioned at the bottom left, the "h" is in the center, and the "p" is at the top right. The blue oval has a thin black outline and a slight gradient, appearing darker at the top and lighter at the bottom. The entire logo is set against a plain white background.

I have absolutely no idea how to write a programming language,

I don't know how to stop it, there was never any intent to write a programming language [...] I have absolutely no idea how to write a programming language, I just kept adding the next logical step on the way.

I don't know how to stop it

There are people who actually like programming.

I don't understand why they like programming.

Yes, I am a terrible coder, but I am probably still better than you :)

but I am probably still better than you :)

I still am really bad at writing parsers.

Ugly problems often require ugly solutions. Solving an ugly problem in a pure manner is bloody hard.

bloody hard

Ugly problems often require ugly solutions.

We have things like protected properties. We have abstract methods. We have all this stuff that your computer science teacher told you you shouldn't be using. I don't care about this crap at all.

I don't care about this crap at all.
this crap

Rasmus Lerdorf

@rasmus

Breaking the Web

Creator of PHP

Back when PHP had less than 100 functions and the function hashing mechanism was `strlen()`

the function hashing mechanism was `strlen()` **`strlen()`**

I'm not a real programmer. I throw together things until it works then I move on. The real programmers will say "Yeah it works but you're leaking memory everywhere. Perhaps we should fix that." I'll just restart Apache every 10 requests.

I throw together things until it works

I'm not a real programmer

I actually hate programming

**“I have absolutely no idea how to write a
programming language,**

**I just kept adding the next
logical step on the way.”**

– Rasmus Lerdorf

The background of the slide features a subtle, abstract design composed of numerous overlapping, semi-transparent colored waves. These waves are primarily in shades of light blue, teal, orange, and pink, creating a soft, flowing pattern across the entire frame.

“Ugly problems often require ugly solutions.”

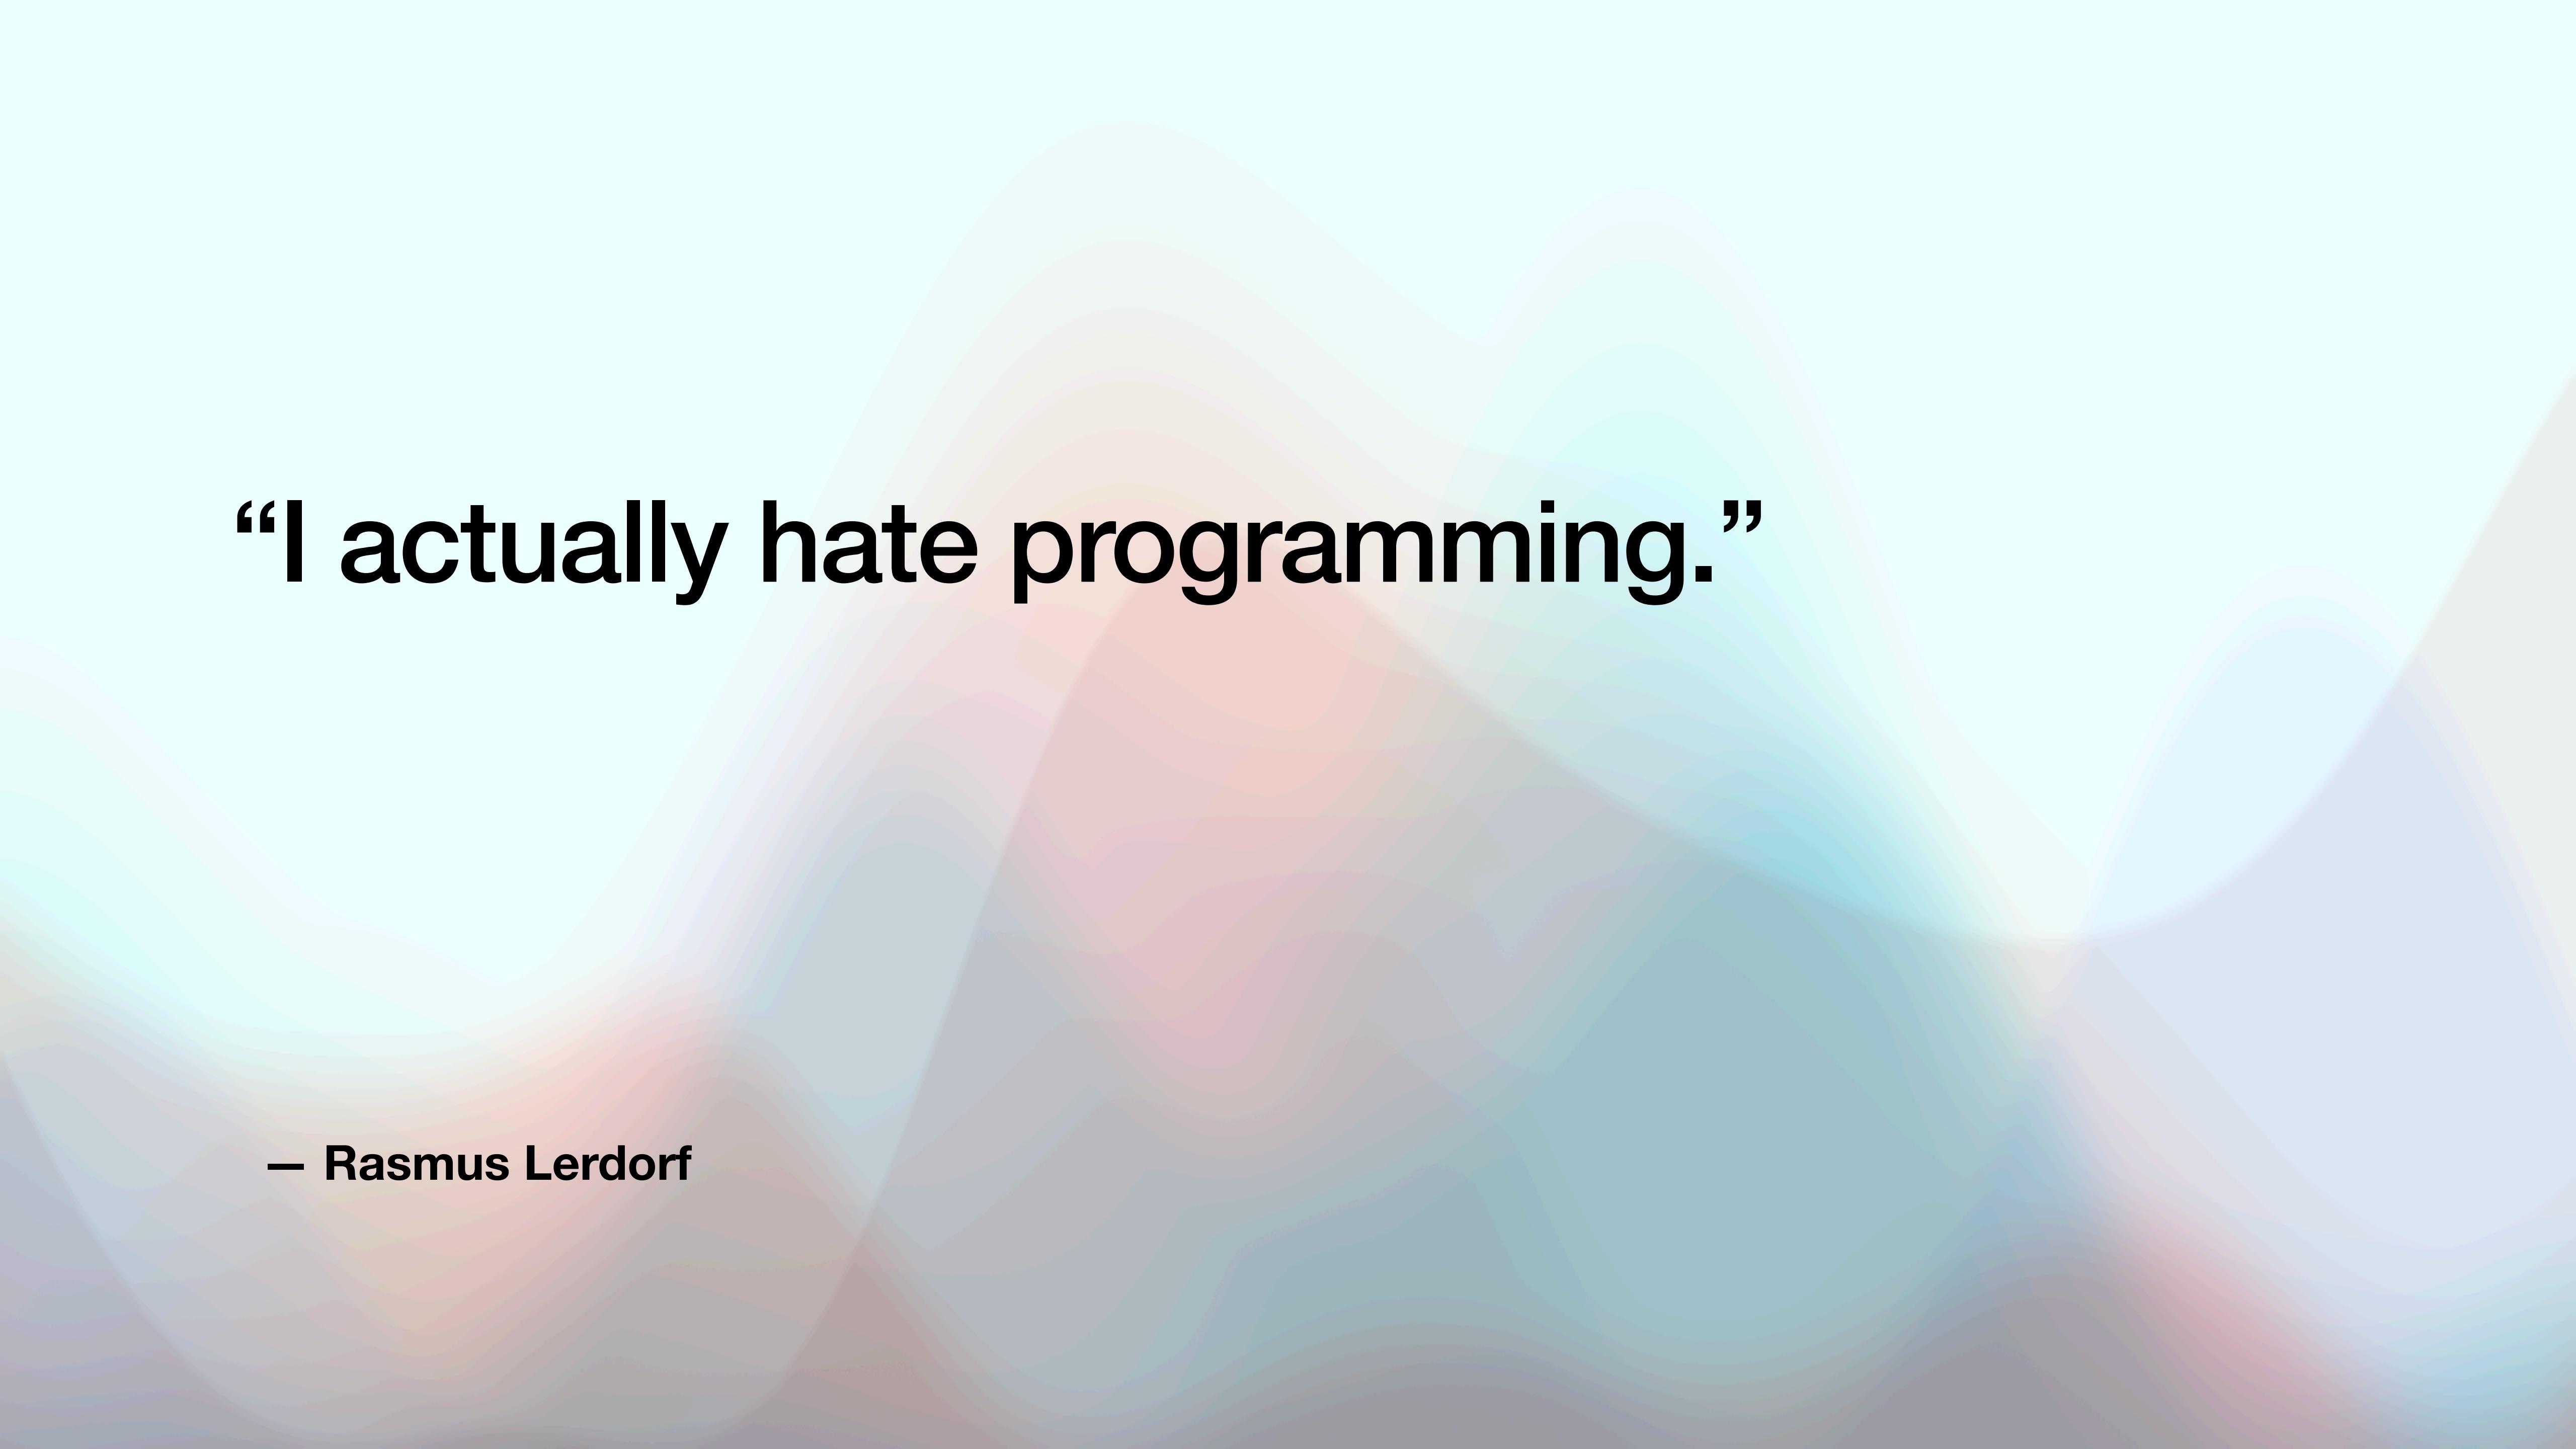

— Rasmus Lerdorf

“I don't care about this crap at all.”

Final 2 (1).psd

Final 2 (1) definitely final.psd

Linus > Rasmus

**“I decided I can write something better
than anything out there in two weeks,
and I was right.”**

– Linus Torvalds

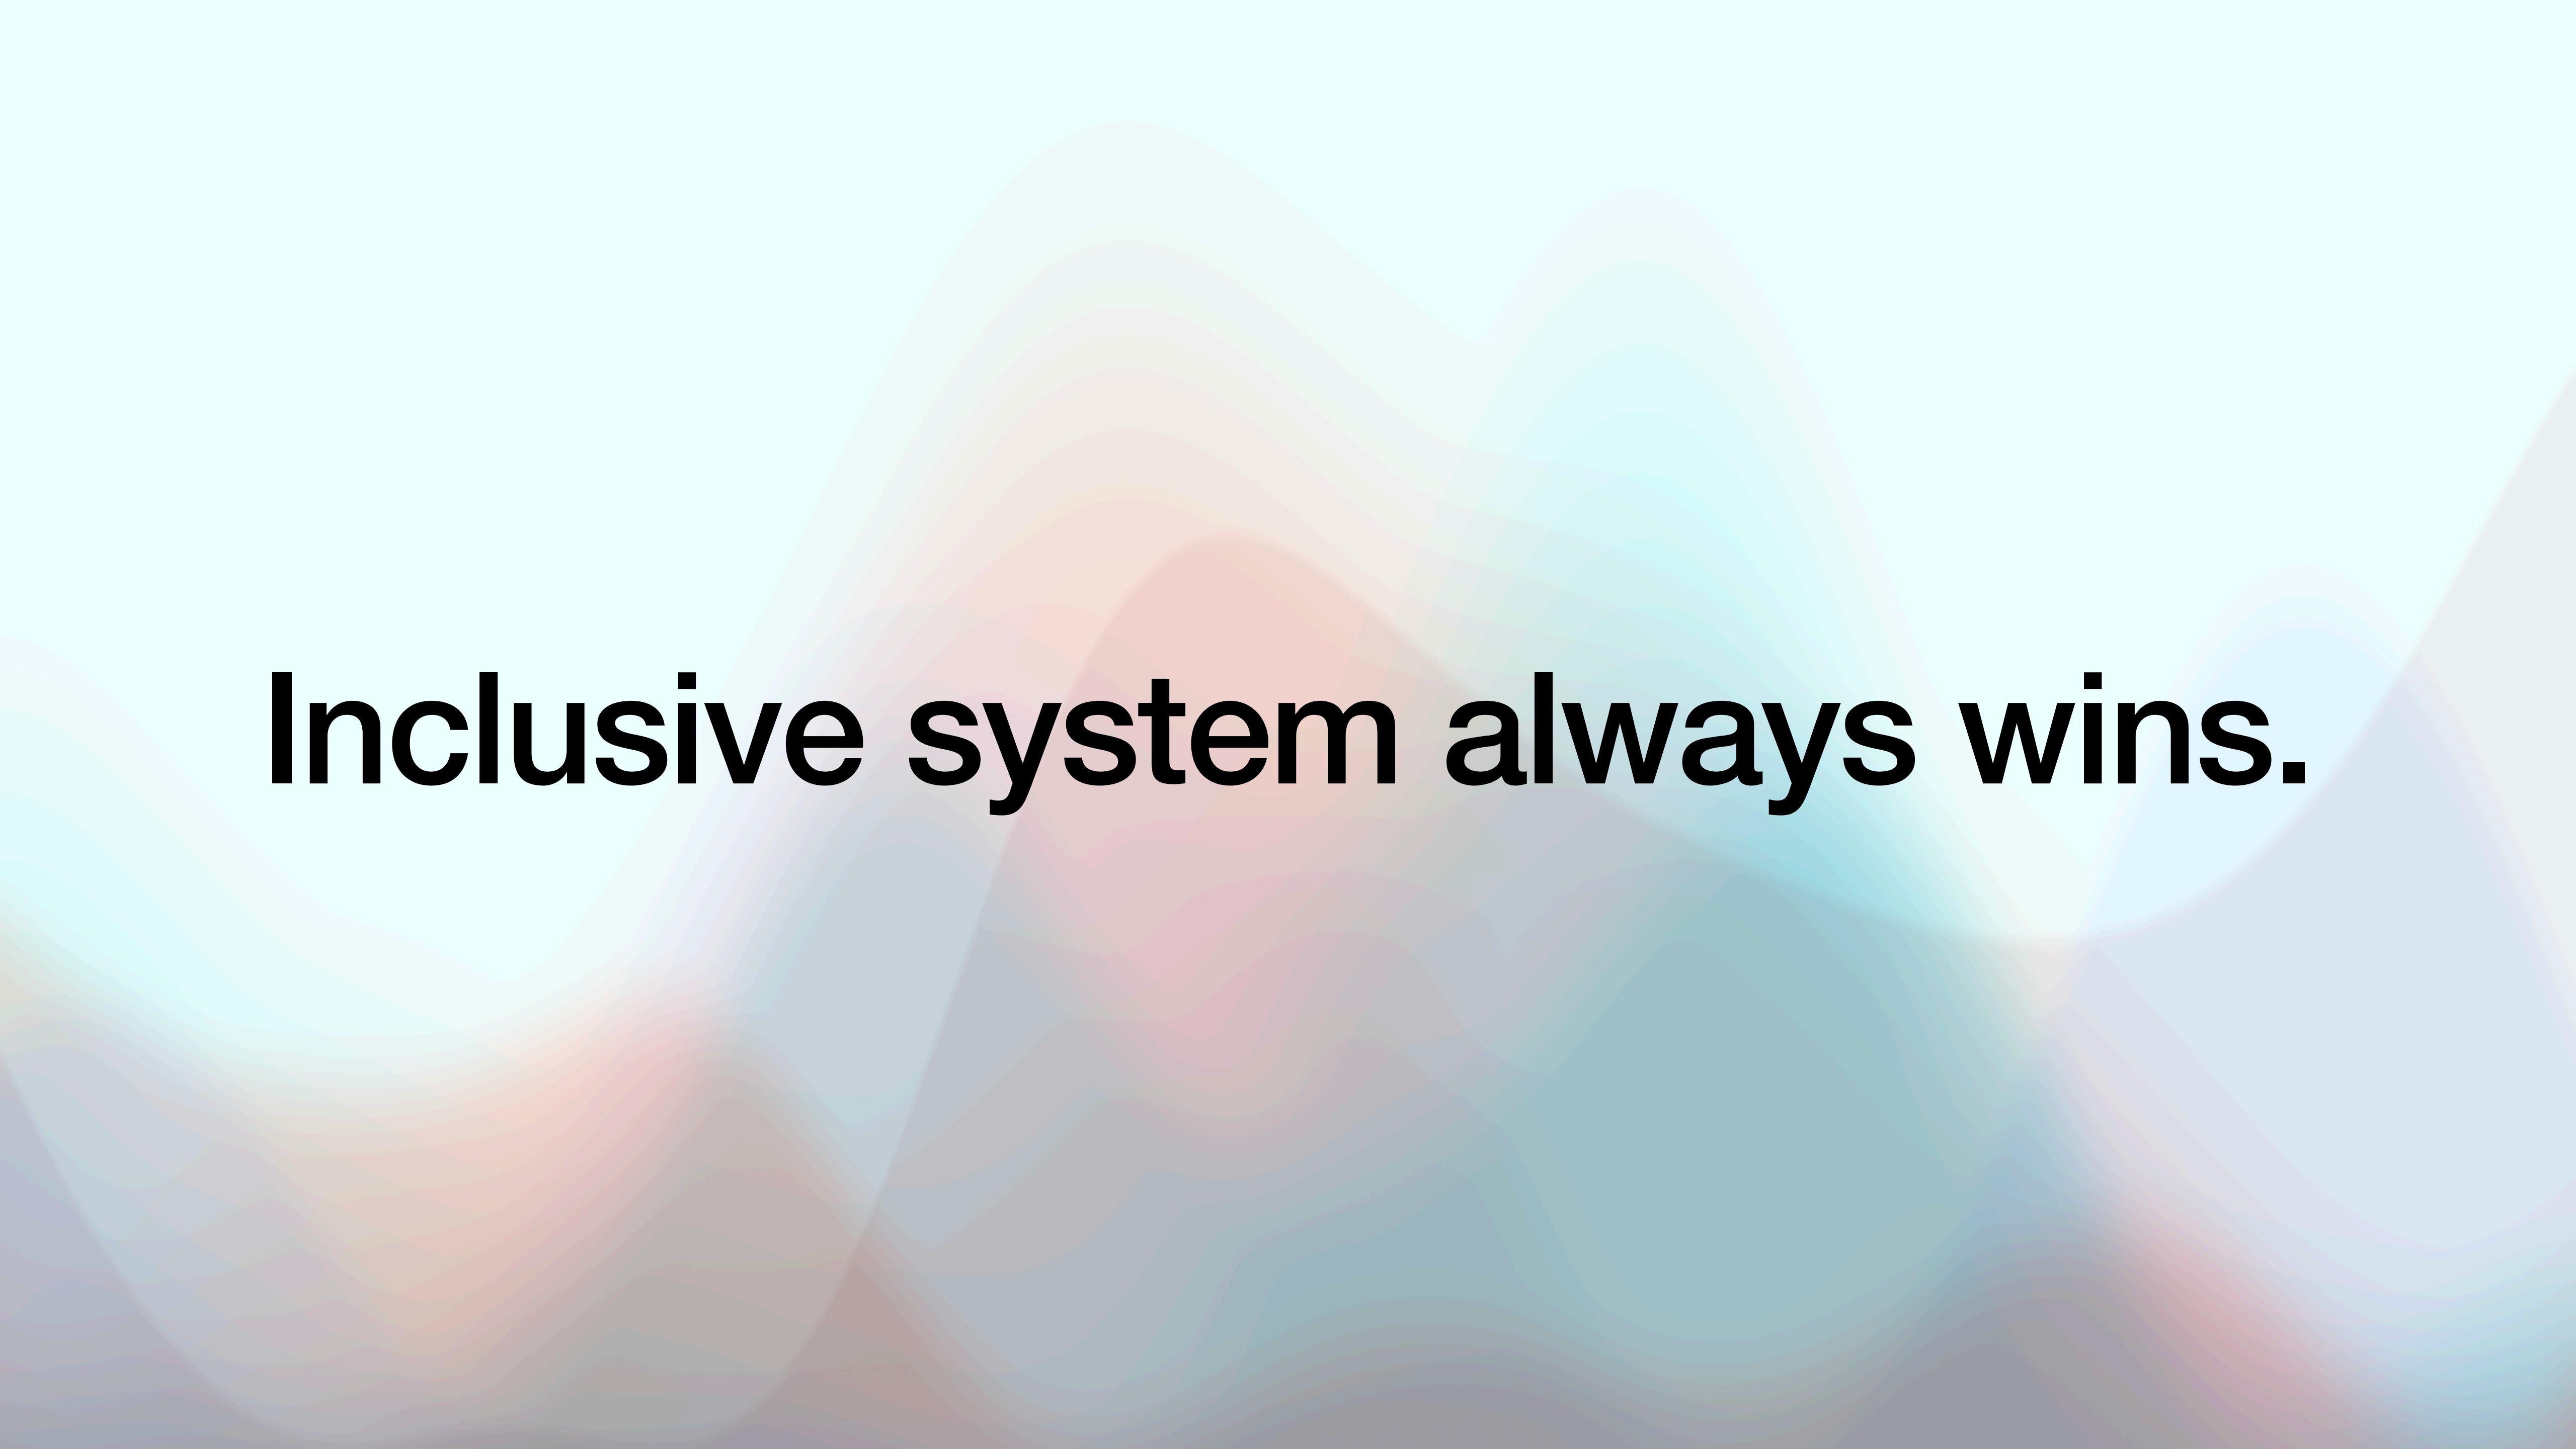

1. Linus Torvalds (Git)
2. John Resig (jQuery)
3. Rasmus Lerdorf (PHP)

1. Linus Torvalds (Git)

2. John Resig (jQuery)

3. Rasmus Lerdorf (PHP)

The background of the slide features a subtle, abstract design composed of numerous overlapping ellipses. These ellipses are rendered in soft, pastel-like colors including light blue, pink, orange, and yellow. They are arranged in a way that creates a sense of depth and movement, radiating from the center of the frame.

Inclusive system always wins.

1. Solve a very specific problem
2. Low entry barrier
3. No flavour

📄 alpine-curl-bash

```
1 FROM alpine
2 RUN apk add --no-cache curl bash
3 CMD ["/bin/sh"]
4 |
```

Hide description

Projects

An almost complete log of projects I've started, with but never even started.

- 👉 — very important project
- 🧐 — extremely hard project
- 🤡 — joke project
- 🚧 — project under construction
- 💖 — love the idea, still waiting
- 💻 — accidental reinvention

The background of the slide features a subtle, abstract design composed of numerous overlapping ellipses. These ellipses are rendered in soft, pastel-like colors including light blue, pink, orange, and yellow. They are arranged in a way that creates a sense of depth and movement, radiating from the center of the frame.

Impact is beauty.

The background of the slide features a subtle, abstract design composed of numerous overlapping ellipses. These ellipses are rendered in soft, pastel-like colors including light blue, pink, yellow, and orange. They are arranged in a way that creates a sense of depth and movement across the entire frame.

**If the result itself is the enough of a
reward for the artist, it's art.**

If it's not, it's not.

The background of the slide features a subtle, abstract design composed of numerous overlapping, semi-transparent colored layers. These layers create a soft, undulating effect across the entire frame, with colors transitioning through various shades of pink, purple, blue, and green. The overall aesthetic is modern and organic, providing a gentle visual context for the central text.

Queer culture

Haiku os is a queer operating system.

Our work will not ever define the future of operating systems, but what it does do is undermine the monotone machinery of the competition.

It is in this niche that we can operate best.

Because even though we have no future, it does not mean that there will not arrive one eventually.

Let us get there the most pleasant way possible.

The background features a subtle, abstract design composed of numerous overlapping, semi-transparent colored layers. These layers create a soft, blurred effect with a color palette that includes shades of pink, purple, blue, and yellow. The layers are more concentrated in the center of the frame, gradually thinning out towards the edges.

You will love it.

Thank you
